1900s
First soybean seeds arrive in Brazil; small scale in São Paulo, small coastal settlements, expansion of agroindustry; rural population 9%.

1960s
Forest decreases. New crops emerge, expansion in Cerrado regions. Population in cities expands. EMBRAPA is established under the military regime.

1990s
Increased deforestation. GMO crops and mechanization. Rural population decreases. Cities boom. Infrastructures and ports expand for export.

2000s
Deforestation remains stable. Operational landscapes intensify.
